EMPLOYMENT HISTORY

03/2026 – Present | Frontend Developer

Nubisoft (Project: KITA)

- Developed the React/TypeScript frontend using a modern component-driven architecture with Radix UI primitives, TanStack Router/Query, and AG Grid for data-heavy views.
- Performed manual testing of new features, verifying acceptance criteria.
- Tech: React, TypeScript, Vite, TanStack Router/Query, Radix UI, Tailwind CSS, React Hook Form + Zod, AG Grid

07/2024 – Present | E2E Tester

Nubisoft (Project: ID Berlin)

- Contributed to the ID Berlin project by developing and maintaining Cypress E2E tests.
- Improved E2E suite stability by refactoring to POM and reducing flaky tests. Approximately 600 test scripts have been written in the monorepo.
- Conducted manual exploratory testing to identify edge cases and validate new features prior to automation.
- Maintained direct contact with the client and the frontend team to align on requirements and priorities.
- Tech: Cypress, TypeScript, React, Visual Regression Tracker, Azure DevOps/Azure Pipelines (CI/CD)

04/2022 – 03/2025 | Frontend Developer & E2E Tester

Nubisoft (Project: DataGenie)

- Worked on the DataGenie project, building and refactoring data-processing views with chart visualizations.
- Refactored legacy code to improve maintainability and performance.
- Designed the entire application store architecture using Redux Toolkit.
- Designed view structure and state management, implemented Plotly/ECharts charts.
- Added Cypress E2E tests and improved rendering performance.
- Tech: React, TypeScript/JavaScript, Redux Toolkit, REST APIs, Cypress, CSS Modules, react-konva, Docker, GitLab CI/CD, Node.js

07/2021 – 04/2022 | Junior Frontend Developer

Nubisoft (internal projects)

- Onboarding into the React/TypeScript ecosystem, supporting smaller frontend tasks and familiarising with team workflows and CI/CD tooling.
